# GROWTH STRATEGY

## **Company History:**

We were established in: 2021 as Core Webber (Pty) Ltd. which is a consulting engineering firm. It has a head office in Allen's Nek, Roodepoort, Johannesburg, South Africa.

The consulting firm focuses on developing novel strategies for controlling water loss in pipeline distribution networks and waterworks used by utilities, agriculture, construction, mining, and other industries.

Hitherto, Core Webber (Pty) Ltd. offers novel strategies for managing water loss in pipeline distribution networks and waterworks for a variety of clients.

South Africa and Africa's public and private sector markets are our primary focus.

Core Webber, an engineering firm driven by technology, also designs, constructs, manages, and maintains water treatment plants.

Core Webber uses a number of Artificial Intelligence (AI) based

solutions for the water sector and provides actual solutions to address specific, real challenges in real-life water systems.

## Business Goals:

- Core Webber is specialized in development of innovative solutions for water loss management in water works and pipeline distribution networks in the utilities, agriculture, mining industries.

Yet, Core Webber goal is providing a real solution, solutions that are sustainable, mobile, adaptable, resourceful, and efficient. Solutions that are changing lives, communities, businesses, ecosystems, and environments for the better. We believe that environmental responsibility is of utmost importance in today's operating environment. Technologies and techniques exist today that didn't in the last decade or even in the last few years making recycling, and reuse practices not only good for the environment but a business's bottom line as well.

## **Growth Strategy**

- Deliver professional services of high quality on time and within budget.

Come up with a strategy for following up with each customer to assess performance.

Develop and uphold a policy for quality control and assurance.

## **Company Vision:**

Core Webber is specialized in development of innovative solutions for water loss management in water works and pipeline distribution networks in the utilities, agriculture, mining industries.

Yet, Core Webber goal is providing a real solution, solutions that are sustainable, mobile, adaptable, resourceful, and efficient. Solutions that are changing lives, communities, businesses, ecosystems, and environments for the better. We believe that environmental responsibility is of utmost importance in today's operating environment.

Technologies and techniques exist today that didn't in the last decade or even in the last few years making recycling, and reuse practices not only good for the environment but a business's bottom line as well.

## Company Mission:

To provide clients in South Africa and Africa with the most cutting-edge technology for sustainable asset value optimization by collaborating with a highly skilled professional team that employs common sense and practical experience.

# ABOUT US

## Products and Services:

### Civil Engineering Services

- Building
- Plastering
- Painting
- Electricity (solar and AC electricity)
- Electric fence
- Installation of gate motor, cameras and alarms
- Ceiling and roofing
- Hatch room
- Plumbing
- Lawn and irrigation system
- Interior and exterior design
- Gate fabrication

### Maintenance and management

- A residential complex with various apartments spread across one or more buildings
- Offices
- Warehouses
- Houses

**Well-trained staffing with degree-holding supervisors and site managers on big projects or sites.**

## Location and Market Area:

Gauteng, Johannesburg, South Africa

## Portfolio of Clients Assisted:

RAND WATER

BULB WIRE PTY (LTD)
